OVERVIEW

Experienced Front-end Engineer with 9 Years of Web Development. Skilled in developing responsive web designs, creating user-friendly interfaces, and ensuring web accessibility.

CAREER SUMMARY

- Developed and maintained the front-end of web applications using HTML5, CSS3, JavaScript, Typescript, Angular14 and React technologies.
- Collaborated with designers and back-end developers to ensure seamless integration of front-end and back-end code.
- Created responsive web designs that provided optimal viewing and interaction across a wide range of devices and screen sizes.
- Collaborated with cross-functional teams to ensure the delivery of high-quality, fully functional web applications.
- Gained experience to make Application with State Management in Angular using NgRx.
- Gained experience in creating reusable component which are shared across different applications using Angular Storybook
- Have basic working knowledge on module federation porting different Angular applications.
- Worked on unit testing for our modules which required 80% code coverage with Test frameworks like Jasmine and Karma
- Have basic knowledge on e2e testing using cypress.
- Excellent team player with good communication skills and quick learner
- Has the ability to quickly adapt to new environments and technologies.

PROFESSIONAL EXPERIENCE

Apr 21 – Till Date	Member of Technical Staff	VMware India	Chennai
Oct 18 – Mar 21	Software Engineer	Mesh7 Pvt Ltd	Chennai
Oct 17 – Oct 18	UI Developer	Newt Global India Pvt Ltd	Chennai
JAN 15 – Oct 17	UI Developer	Bonaven Software Pvt Ltd	Hyderabad

EDUCATION

Master of Technology: Software Engineering

Aurora's Technological Research Institute - Hyderabad

2015

Bachelor of Science: Information Technology

Vignan's Engineering College - Guntur

2011

SKILLS

Tech Stack

JavaScript, jQuery, TypeScript, React, Kubernetes, RWD, GIT, Elasticsearch GraphQL, Angular 14, Angular CLI, NGRX, High charts.

UI Frameworks

(viz., Clarity UI, Angular Material, Bootstrap)

Testing

Frameworks

Jasmine, karma

Reusable

component-based library, Storybooks

Operating Systems

*NIX, Windows 10, Mac OS

PROJECTS

ARIA HUB

Angular 14, HTML, CSS3, Clarity UI, Jasmine, Karma

VMWARE

Duration: 0.5 Year

SYNOPSIS VMware Aria Hub is a unified management solution for VMware cloud and multi-cloud environments. VMware Aria is powered by VMware Aria Graph, a new graph-based data store technology that reduces multi-cloud complexity across any cloud, any app, and for every persona.

ROLE & RESPONSIBILITIES	<ul style="list-style-type: none">• Worked in the Spaces Feature.• Involved in the design process of Spaces UI and been a part of the actual implementation team.• Developed Unit Testcases for Spaces, Traits.• Worked with Team across Geo Locations
------------------------------------	---

TANZU SERVICE MESH (TSM)

Angular 14, HTML, CSS3, Clarity UI, Jasmine, Karma, High Charts

VMWARE

Duration: 2.7 Years

SYNOPSIS Tanzu Service Mesh provides advanced, end-to-end connectivity, security, and insights for modern applications—across application end-users, microservices, APIs, and data—enabling compliance with Service Level Objectives (SLOs) and data protection and privacy regulations.

ROLE & RESPONSIBILITIES	<ul style="list-style-type: none">• Responsible for integrating the Mesh7 features into the TSM.• Been part of the actual implementation team.• Developed Unit Testcases for the features.• Worked with Team across Geo Locations
------------------------------------	--

MESH7

Angular10,11, HTML, CSS3, Clarity UI, Jasmine, Karma, High Charts

MESH7

Duration: 2.5 Years

SYNOPSIS Tanzu Service Mesh provides advanced, end-to-end connectivity, security, and insights for modern applications—across application end-users, microservices, APIs, and data—enabling compliance with Service Level Objectives (SLOs) and data protection and privacy regulations.

ROLE & RESPONSIBILITIES	<ul style="list-style-type: none">• Responsible for integrating the Mesh7 features into the TSM.• Been part of the actual implementation team.• Developed Unit Testcases for the features.• Worked with Team across Geo Locations
------------------------------------	--

SYNOPSIS

The Integrated Verizon Advanced Provisioning Platform (iVAPP) is an FTTP provisioning platform for voice data video and specials. iVAPP interfaces with existing provisioning systems for voice (AAIS- Core/SOAC) and data (BAAIS). iVAPP will manage assignable inventory provisioning and activate FTTP network elements (OLT, ONT and Voice Gateway) and ODN. The system will integrate the provisioning in an end- to-end workflow and manage manual fallout using skill set based routing. The system provides a GUI that supports inquiries and manual assignment for the fallouts as well as reports and metrics for the FTTP network and services. It also provides the centers with a visibility towards end-to-end service record.

ROLE & RESPONSIBILITIES	<ul style="list-style-type: none"> • Project is mainly a migration from JSP to Angular 4 • Worked in creating Components for every individual Screen. • Creating Template Driven Forms and Accordion based UI and navigation and Scrolls • Worked on multi-tab-based environment using Shared Resources and Shared Services. • Worked in implementing Pipes, Directives, Component interactions & CRUD operations. • Worked with SVG for Pictorial representation of Telecom Equipment like, OLT, ONT, HUB, Splitters, and Port Conventions • Well versed in using Angular CLI.
